

Our Mission

To our supporters,

We wanted to take a moment to reiterate our mission, goals, contact information, and how you can help.

The mission of the Google Twin Ports Fiber Initiative is to win the Google Fiber project by showing Google the community's passion for fiber – high speed Internet, video and voice – the highly skilled workforce in our communities, the strong, supportive entrepreneurial environment, and the community's visionary leadership.

A. Fiber to each home and business is critical to Duluth and Superior's economic vitality.

B. Communities that receive fiber first will be the ones that gain the biggest economic benefit, like the first towns with the railroad, electricity or Interstate highways.
